In high school I was fairly uncertain of my life path. My junior year expedition upon the Salish Sea made me so excited about marine science that I decided to pursue a degree in Marine Biology. I have since become an outdoor educator myself, spending part of the year working on other science education vessels, and part of the year working at outdoor schools on land.

Because of Salish Sea Expeditions, my primary goal in life became to create in students the same excitement, the same feeling of self-efficacy, the same desire for learning science that the educators aboard the Carlyn instilled in me during my formative years.

- Taylor, Salish Alumni ('10 & '11)
"Woah, I'm Chief Scientist, that's so cool."
- Middle School Student

Because of you, 1 out of 5 students attended a Salish Sea Expeditions program for free.

Thank You.

"Salish expeditions take science from being an abstract kind of thing to a very real experience of this is science: it is about learning more about our world and the results of our interactions with it."
- Parent Chaperone

"The kids have a new sense of navigation, protecting the environment, principles of sailing, and teamwork."
- Middle School Teacher

"My favorite time was yelling and doing science and challenge day. Thank you again for thinking we are not little kids."
- Sam, 5th Grade

Your generosity supports hands-on science inquiry on the Salish Sea. Together, we are empowering students in grades 5-12 to conduct marine science research of their own design aboard a 61-foot sailing vessel, instilling curiosity, confidence, and critical thinking. Learn more about upcoming programs and events at SALISH.ORG.

We Value Your Partnership

Here's how we put your gift into action in support of Salish programs for the period:
June 2017 - June 2018

**REVENUE**
- Program Fees: 34%
- Foundations: 21%
- Individuals: 45%

**EXPENSES**
- Program Services: 79%
- Fundraising: 14%
- Administration: 7%
